Scenario governance report

Purpose: controlled FY2026 scenario framework for Cedar Works.
Scope: synthetic management planning data in JPY millions; no real accounts or counterparties.
Control owner: Finance Controller | Reporting date: 2026-03-31

Scenario	Revenue	EBITDA	Ending cash	Liquidity
Budget	7,400	860	500	PASS
Downside	7,050	720	310	PASS
Base	7,560	900	540	PASS
Upside	7,920	1,020	610	PASS

Q1 actual revenue: 1,842 | Q1 actual EBITDA: 222.
March bank cash: 486.2; ledger cash: 498.6; unfavorable variance: 12.4.
Drivers: receipt timing 7.2 + vendor timing 3.1 + fees 1.3 + FX 0.8 = 12.4.

Controls, triggers and committee cadence

Minimum liquidity floor: JPY 250m. Downside ending cash: JPY 310m; headroom: JPY 60m.
Stress drivers: FX, revenue, margin, and working capital. Each scenario must retain PASS.

Control	Threshold	Review evidence	Owner
Cash reconciliation	Bank + 12.4 = ledger	Monthly close support	Finance Controller
Liquidity	Ending cash >= 250	Weekly treasury view	Treasury Analyst
Scenario drivers	FX, revenue, margin, WC	Monthly refresh	FP&A Lead
Escalation	Ending cash < 300	Response plan	Finance Controller

Committee decision: approve a downside trigger at JPY 300m ending cash.
Review scenario inputs monthly and cash headroom weekly while downside conditions persist.
