

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-008790

Assigned review context: 2026-07-13

Traceability check

The report asks whether the case reference provides enough basis for a linkage review. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Decision basis

The intake attachment must remain connected to its stated request and evidence marker. For this record, the reasoned result is separate from source context. Assigned period: 2026-07-13; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-008790.

Handoff instruction

Compare the source and assigned periods. if an overbroad export field appears, it would obscure the control basis. the record-specific safeguard is to retain the discrepancy as a bounded exception; that preserves an accountable decision without inventing a missing fact.. Confirm request-to-attachment linkage before routing. The report requests no elevated access, customer data, or execution instruction.
