

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-005017

Assigned review context: 2026-07-14

Traceability check

The report asks whether the handoff marker provides enough basis for a queue-transfer check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Control conclusion

The assigned review period is a control context, while the dependency period is a source fact. For this record, the reasoned result is keep as a control reference. Assigned period: 2026-07-14; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-005017.

Evidence handling

Route the missing fact to grc. if an unnamed handoff recipient appears, it would overstate the record evidence. the record-specific safeguard is to compare the governing field with the source record; that preserves an accountable decision without inventing a missing fact.. Record any period variance as an exception rather than overwriting the source. The report requests no elevated access, customer data, or execution instruction.
