

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-005717

Assigned review context: 2026-07-14

Traceability check

The report asks whether the intake record provides enough basis for a review-cadence check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Review logic

Unresolved record facts should stay in review rather than be inferred at closure. For this record, the reasoned result is separate from source context. Assigned period: 2026-07-14; source period: 2026-07-13. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-005717.

Reviewer follow-up

Check the case link at transition. if a residual risk label appears, it would obscure the control basis. the record-specific safeguard is to ask the named reviewer for confirmation; that preserves an accountable decision without inventing a missing fact.. Route the unresolved fact to the GRC owner with this artifact reference. The report requests no elevated access, customer data, or execution instruction.
