

AC-27 Assurance Report: Intake hypothesis

Record reference: AC-27/p03-full-008063

Assigned review context: 2026-07-14

Intake hypothesis

The report asks whether the risk label provides enough basis for a minimum-field check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

record id	INB-016
review date	2026-07-13
control	AC-27
audit request	AR-260713-027
case	CASE-260713-184
evidence set	184
risk	RISK-031
disposition	synthetic intake normalized; bounded review retained
review period	2026-Q3
unique marker	foundation-b001-016

Interpretation of the evidence

Unresolved record facts should stay in review rather than be inferred at closure. For this record, the reasoned result is route as an exception. Assigned period: 2026-07-14; source period: 2026 Q3. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-008063.

Routing outcome

Record the rationale beside the disposition. if a conflicting period label appears, it would leave the next reviewer without context. the record-specific safeguard is to ask the named reviewer for confirmation; that preserves an accountable decision without inventing a missing fact.. Route the unresolved fact to the GRC owner with this artifact reference. The report requests no elevated access, customer data, or execution instruction.
