

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-007290

Assigned review context: 2026-07-14

Traceability check

The report asks whether the risk label provides enough basis for a queue-transfer check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Control conclusion

The intake attachment must remain connected to its stated request and evidence marker. For this record, the reasoned result is ask for owner confirmation. Assigned period: 2026-07-14; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-007290.

Retention action

Record the rationale beside the disposition. if a detached evidence-set value appears, it would leave the next reviewer without context. the record-specific safeguard is to keep the conclusion conditional on the record; that preserves an accountable decision without inventing a missing fact.. Confirm request-to-attachment linkage before routing. The report requests no elevated access, customer data, or execution instruction.
