

# AC-27 Assurance Report: Record reading

Record reference: AC-27/p03-full-006317

Assigned review context: 2026-07-15

## Record reading

The report asks whether the queue owner provides enough basis for a control-reference check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

## Source evidence read for this record

## Control conclusion

Unresolved record facts should stay in review rather than be inferred at closure. For this record, the reasoned result is ask for owner confirmation. Assigned period: 2026-07-15; source period: 2026-07-13. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-006317.

## Exception treatment

Record the rationale beside the disposition. if a conflicting period label appears, it would blur provenance. the record-specific safeguard is to retain the discrepancy as a bounded exception; that preserves an accountable decision without inventing a missing fact.. Route the unresolved fact to the GRC owner with this artifact reference. The report requests no elevated access, customer data, or execution instruction.
