Source and question

Own assigned date or period: 2026-07-15. Direct dependency p03-full-001218 source review date: 2026-07-13; source review period: 2026-Q3. It supplies INB-016: case CASE-260713-184, evidence set 184, risk RISK-031, marker foundation-b001-016, and disposition "synthetic intake normalized; bounded review retained". This disposition note asks whether to assess whether the recorded disposition is specific enough for controlled retention.

Evidence reasoning

The source record linked AR-260713-027 to AC-27. Apply the minimization lens: confirm the retained package is limited to review metadata and does not introduce credentials or customer content. The ordered route is request linkage; then evidence-set boundary; then handling boundary; then case continuity; it preserves source context without treating RISK-031 as closed or remediated.

Decision and actions

Decision: record the retention disposition and route any conflict to the evidence owner. Retain p03-full-001218, preserve the source date and marker foundation-b001-016, and escalate conflicting metadata to the evidence owner. Do not add credentials, customer material, or production-access instructions.

Bounded conclusion

The disposition note is suitable for synthetic AC-27 documentation handling when its record, case, risk, disposition, and marker remain linked. This is not a Kio indexing, search, readiness, or control-effectiveness assertion.
