## Record-specific assessment

Control evidence should contain only fields needed for an accountable review decision. For this record, the reasoned result is route as an exception. Assigned period: 2026-07-15; source period: 2026 Q3. These remain separate facts, so the assigned context never replaces the source record period. Reference:

## Accountable next step

Route the missing fact to grc. if a detached evidence-set value appears, it would detach the evidence context. the record-specific safeguard is to carry the reference into the closure check; that preserves an accountable decision without inventing a missing fact.. Remove repeated export fields after reviewer confirmation. The report requests no elevated access, customer data, or execution instruction.
