

AC-27 Assurance Report: Evidence question

p03-src-004564 | 2026-07-15 | RISK-031

AC-27 Assurance Report: Evidence question

Record reference: AC-27/p03-full-004564

Assigned review context: 2026-07-15

Evidence question

The report asks whether the disposition phrase provides enough basis for an exception-routing check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Source evidence narrative

The source evidence is artifact p03-full-000536 from the 2026-07-14 record period, stored in 2026-07-14-intake-request-attachment-evidence-metrics-csv-s000536.csv. Record ID INB-006 was reviewed on 2026-07-14 under control AC-27 for audit request AR-260713-027 and case CASE-260713-184.

Evidence Set 184 addresses RISK-031. Its disposition is synthetic intake normalized; bounded review retained, and its unique marker is foundation-b001-006. Cobalt Harbor Systems records the traceability that 2026-07-14 is the evidence normalization and checksum confirmation date.

What the record establishes

The evidence chain must retain the case or marker needed for the next GRC reviewer. For this record, the reasoned result is retain with a case link. Assigned period: 2026-07-15; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-004564.

Required follow-through

Route the missing fact to GRC. If an ambiguous case label appears, it would make ownership unclear. The record-specific safeguard is to limit the record to the decision-bearing fields; that preserves an accountable decision without inventing a missing fact. Carry the named marker into the closure handoff. The report requests no elevated access, customer data, or execution instruction.

Artifact-specific analysis

For identity lifecycle control, identity was assessed through sampling boundary. The review considered whether the evidence documented in AC-27 Assurance Report: Evidence question supports the RISK-031 assurance decision. The documented outcome is that Cobalt Harbor documented the control conclusion for AC-27 Assurance Report: Evidence question. The limiting counterexample is that the record distinguishes offline documentary evidence from an instruction to operate a system. Exclusion qualified representativeness; threshold constrained joiner; and mover informed leaver. The evidence method segmented approval handoffs, tested excluded cases, and established accountability clarity.

Declared control context

The review timing is 2026-07-15.

Evidence reference ev-184-19 informs the decision.

Cobalt Harbor owns the documented assurance review.

The evidence relationship is audit request-027.

The evidence is offline and makes no Kio capability claim.
