

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-006117

Assigned review context: 2026-07-20

Traceability check

The report asks whether the disposition phrase provides enough basis for a queue-transfer check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Why this matters now

Control evidence should contain only fields needed for an accountable review decision. For this record, the reasoned result is separate from source context. Assigned period: 2026-07-20; source period: 2026 Q3. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-006117.

Closure safeguard

Check the case link at transition. if an unverified control reference appears, it would detach the evidence context. the record-specific safeguard is to record the variance before transition; that preserves an accountable decision without inventing a missing fact.. Remove repeated export fields after reviewer confirmation. The report requests no elevated access, customer data, or execution instruction.
