

AC-27 Assurance Report: Record reading

Record reference: AC-27/p03-full-009964

Assigned review context: 2026-07-20

Record reading

The report asks whether the control label provides enough basis for a closure handoff check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Record-specific assessment

The evidence chain must retain the case or marker needed for the next GRC reviewer. For this record, the reasoned result is retain with a case link. Assigned period: 2026-07-20; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-009964.

Closure safeguard

Document the period distinction. if a detached evidence-set value appears, it would undermine the disposition trail. the record-specific safeguard is to keep the evidence slice with its disposition; that preserves an accountable decision without inventing a missing fact.. Carry the named marker into the closure handoff. The report requests no elevated access, customer data, or execution instruction.
