

AC-27 Assurance Report: Review rationale

p03-src-006017 | 2026-Q3 | RISK-031

AC-27 Assurance Report: Review rationale

Record reference: AC-27/p03-full-006017

Assigned review context: 2026 Q3

Review rationale

The report asks whether the evidence-set marker provides enough basis for an exception-routing check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Source evidence narrative

The source evidence is artifact p03-full-000667 from the 2026-07-13 source record period, stored in 2026-07-13-intake-disposition-note-evidence-metrics-csv-s000667.csv. Record ID INB-008 was reviewed on 2026-07-13 under control AC-27 for audit request AR-260713-027 and case CASE-260713-184.

Evidence Set 184 addresses RISK-031. Its disposition is synthetic intake normalized; bounded review retained, and its unique marker is foundation-b001-008. Cobalt Harbor Systems records the traceability that EV-184-19 is the Evidence Set 184 checksum reconciliation record and that 2026-07-13 is the primary review date.

Control conclusion

Unresolved record facts should stay in review rather than be inferred at closure. For this record, the reasoned result is route as an exception. Assigned period: 2026 Q3; source period: 2026-07-13. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-006017.

Control-owner action

Confirm the related request before closure. If a missing queue owner appears, it would make the handoff non-auditable. The record-specific safeguard is to compare the governing field with the source record; that preserves an accountable decision without inventing a missing fact. Route the unresolved fact to the GRC owner with this artifact reference. The report requests no elevated access, customer data, or execution instruction.

Artifact-specific analysis

The residual-risk review review addressed identity lifecycle control. The review considered whether the evidence documented in AC-27 Assurance Report: Review rationale supports the RISK-031 assurance decision. The documented outcome is that Cobalt Harbor documented the control conclusion for AC-27 Assurance Report: Review rationale. The limiting counterexample is that the record distinguishes offline documentary evidence from an instruction to operate a system. Safeguard qualified monitoring; contingency constrained joiner; and mover informed leaver. The evidence method reconciled delegated ownership, tested escalation paths, and established assurance coverage.

Declared control context

Cobalt Harbor owns the documented assurance review.

The review period is 2026-Q3.

The evidence relationship is audit request-027.

Declared control context: term minimized-export.

The evidence is offline and makes no Kio capability claim.
