

AC-27 Assurance Report: Intake hypothesis

Record reference: AC-27/p03-full-007590
Assigned review context: 2026 Q3

Intake hypothesis

The report asks whether the period label provides enough basis for a provenance check. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Why this matters now

The intake attachment must remain connected to its stated request and evidence marker. For this record, the reasoned result is preserve as bounded evidence. Assigned period: 2026 Q3; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-007590.

Control-owner action

Remove redundant fields after sign-off. if an unbound attachment marker appears, it would make ownership unclear. the record-specific safeguard is to limit the record to the decision-bearing fields; that preserves an accountable decision without inventing a missing fact.. Confirm request-to-attachment linkage before routing. The report requests no elevated access, customer data, or execution instruction.
