

AC-27 Assurance Report: Intake hypothesis

Record reference: AC-27/p03-full-008364
Assigned review context: 2026 Q3

Intake hypothesis

The report asks whether the review-date field provides enough basis for a disposition trace. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

What the record establishes

The intake attachment must remain connected to its stated request and evidence marker. For this record, the reasoned result is ask for owner confirmation. Assigned period: 2026 Q3; source period: 2026-07-20. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-008364.

Evidence handling

Retain the marker in the handoff. if an unbound attachment marker appears, it would conceal a period distinction. the record-specific safeguard is to compare the governing field with the source record; that preserves an accountable decision without inventing a missing fact.. Confirm request-to-attachment linkage before routing. The report requests no elevated access, customer data, or execution instruction.
