

AC-27 Assurance Report: Traceability check

Record reference: AC-27/p03-full-009064

Assigned review context: 2026 Q3

Traceability check

The report asks whether the queue owner provides enough basis for a source-period comparison. It is synthetic defensive GRC evidence for Cobalt Harbor Systems and makes no Kio indexing, search, or readiness claim.

Queue implication

The evidence chain must retain the case or marker needed for the next GRC reviewer. For this record, the reasoned result is ask for owner confirmation. Assigned period: 2026 Q3; source period: 2026-07-14. These remain separate facts, so the assigned context never replaces the source record period. Reference: AC-27/p03-full-009064.

Closure safeguard

Review the owner field before routing. if a detached evidence-set value appears, it would blur provenance. the record-specific safeguard is to carry the reference into the closure check; that preserves an accountable decision without inventing a missing fact.. Carry the named marker into the closure handoff. The report requests no elevated access, customer data, or execution instruction.
