

Privacy Assurance Report 002870

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-13

Review focus: assessment scope review

Determination

Artifact 002870 is a synthetic Cobalt Harbor Systems privacy assurance record for assessment scope review.

Assigned review period: 2026-07-13. It is distinct from the direct dependency source period(s): 2026-07-14.

Review question: Whether the assessment-scope report's source selection is sufficient to support a residual-risk statement.

Evidence selection: Use the source metric's completeness and residual-rating rows only.

Ordered test and counterexample: Reperform completeness reading, then test the counterexample that a Medium residual rating means no remaining action.

Observation: Medium remains a documented residual governance risk.

Decision and action owner/timing: The GRC reviewer retains the report and requests no new evidence until the assigned follow-up.

Boundary: the record is synthetic defensive GRC documentation only and makes no Kio indexing, search, history, or performance claim.

Direct dependency p03-full-000152 (2026-07-14) states: Record 152 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-000152	2026-07-14	Record 152 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
