

Privacy Assurance Report 009138

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-13

Review focus: assessment scope review

Determination

Artifact 009138 is a synthetic Cobalt Harbor Systems privacy assurance record for assessment scope review.

Assigned review period: 2026-07-13. It is distinct from the direct dependency source period(s): 2026-07-13.

Causal question: Can the approval-separation check be evaluated through the selected decision linkage without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the owner escalation through the review memorandum, specifically resisting unbounded reuse.

Evidence selection: decision linkage is assessed in relation to treatment-owner acknowledgement; no unassigned record is treated as a source.

Ordered test: verify that the communication avoids personal-record assertions; then apply the decision rule: retain provenance when a later artifact cites an earlier record.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the treatment narrative leaves residual risk explicit.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant approval-separation check is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this decision linkage; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-001896 (2026-07-13) states: Record 1896 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-001896	2026-07-13	Record 1896 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
