

# Privacy Assurance Report 002837

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

**Assigned review period:** 2026-07-13

**Review focus:** risk-rating review

## Determination

Artifact 002837 is a synthetic Cobalt Harbor Systems privacy assurance record for risk-rating review.

Assigned review period: 2026-07-13. It is distinct from the direct dependency source period(s): 2026-07-20.

Causal question: Can the exception-age signal be evaluated through the selected action timing without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the evidence completeness through the action tracker, specifically resisting population inference.

Evidence selection: action timing is assessed in relation to evidence identifier continuity; no unassigned record is treated as a source.

Ordered test: verify that the communication avoids personal-record assertions; then apply the decision rule: accept only a conclusion bounded to the stated period.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the review frame keeps source material synthetic.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant exception-age signal is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this action timing; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-001006 (2026-07-20) states: Record 1006 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope.

## Direct dependency facts

| Dependency      | Source period | Source determination                                                                                                                                                                           |
|-----------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p03-full-001006 | 2026-07-20    | Record 1006 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope. |

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
