

# Privacy Assurance Report 005291

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

**Assigned review period:** 2026-07-13

**Review focus:** treatment review

## Determination

Artifact 005291 is a synthetic Cobalt Harbor Systems privacy assurance record for treatment review.

Assigned review period: 2026-07-13. It is distinct from the direct dependency source period(s): 2026-07-13.

Causal question: Can the planning-to-follow-up transition be evaluated through the selected population qualifier without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the retention threshold through the boundary statement, specifically resisting population inference.

Evidence selection: population qualifier is assessed in relation to follow-up decision trace; no unassigned record is treated as a source.

Ordered test: reperform the stated control-evidence handoff as a documentation review; then apply the decision rule: escalate only when the counterexample changes the governance boundary.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the scope statement does not expand the underlying population.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant planning-to-follow-up transition is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this population qualifier; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-002665 (2026-07-13) states: Record 2665 concludes that risk rating requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

## Direct dependency facts

| Dependency      | Source period | Source determination                                                                                                                                                                      |
|-----------------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p03-full-002665 | 2026-07-13    | Record 2665 concludes that risk rating requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope. |

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
