

Privacy Assurance Report 006863

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-13

Review focus: treatment review

Determination

Artifact 006863 is a synthetic Cobalt Harbor Systems privacy assurance record for treatment review.

Assigned review period: 2026-07-13. It is distinct from the direct dependency source period(s): 2026-07-13.

Causal question: Can the planning-to-follow-up transition be evaluated through the selected evidence-register entry without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the checksum custody through the exception record, specifically resisting privacy overreach.

Evidence selection: evidence-register entry is assessed in relation to follow-up decision trace; no unassigned record is treated as a source.

Ordered test: compare the reported residual rating with its documented treatment context; then apply the decision rule: avoid recasting planning context as closure evidence.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the scope statement does not expand the underlying population.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant planning-to-follow-up transition is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this evidence-register entry; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-002665 (2026-07-13) states: Record 2665 concludes that risk rating requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-002665	2026-07-13	Record 2665 concludes that risk rating requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
