

# Privacy Assurance Report 008338

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

**Assigned review period:** 2026-07-14

**Review focus:** assessment scope review

## Determination

Artifact 008338 is a synthetic Cobalt Harbor Systems privacy assurance record for assessment scope review.

Assigned review period: 2026-07-14. It is distinct from the direct dependency source period(s): 2026-07-13.

Causal question: Can the closure-evidence handoff be evaluated through the selected action timing without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the reviewer separation through the disposition log, specifically resisting privacy overreach.

Evidence selection: action timing is assessed in relation to checksum-confirmation route; no unassigned record is treated as a source.

Ordered test: separate planning-period intent from closure-review evidence; then apply the decision rule: limit the finding to the frozen evidence set.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the evidence wording avoids treating a planning date as a source date.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant closure-evidence handoff is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this action timing; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-002456 (2026-07-13) states: Record 2456 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

## Direct dependency facts

| Dependency      | Source period | Source determination                                                                                                                                                                   |
|-----------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p03-full-002456 | 2026-07-13    | Record 2456 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope. |

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
