

Privacy Assurance Report 009038

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-14

Review focus: assessment scope review

Determination

Artifact 009038 is a synthetic Cobalt Harbor Systems privacy assurance record for assessment scope review.

Assigned review period: 2026-07-14. It is distinct from the direct dependency source period(s): 2026-07-14.

Causal question: Can the minimized-export lineage be evaluated through the selected checksum reference without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the privacy minimization through the action tracker, specifically resisting role conflation.

Evidence selection: checksum reference is assessed in relation to minimized-export scope; no unassigned record is treated as a source.

Ordered test: review the disposition for role-separation language; then apply the decision rule: limit the finding to the frozen evidence set.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the scope statement does not expand the underlying population.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant minimized-export lineage is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this checksum reference; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-000152 (2026-07-14) states: Record 152 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-000152	2026-07-14	Record 152 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
