

Privacy Assurance Report 009538

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-15

Review focus: assessment scope review

Determination

Artifact 009538 is a synthetic Cobalt Harbor Systems privacy assurance record for assessment scope review.

Assigned review period: 2026-07-15. It is distinct from the direct dependency source period(s): 2026-07-13.

Causal question: Can the closure-evidence handoff be evaluated through the selected decision linkage without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the evidence completeness through the exception record, specifically resisting role conflation.

Evidence selection: decision linkage is assessed in relation to checksum-confirmation route; no unassigned record is treated as a source.

Ordered test: check that the evidence description remains minimized and synthetic; then apply the decision rule: separate mitigation from historical correction.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the documentation preserves the delayed-attestation context.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant closure-evidence handoff is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this decision linkage; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-002456 (2026-07-13) states: Record 2456 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-002456	2026-07-13	Record 2456 concludes that data-use requires a bounded AC-27 evidence review for 2026-07-13; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
