

Privacy Assurance Report 002784

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-15

Review focus: data-use boundary

Determination

Artifact 002784 is a synthetic Cobalt Harbor Systems privacy assurance record for data-use boundary.

Assigned review period: 2026-07-15. It is distinct from the direct dependency source period(s): 2026-q3.

Causal question: Can the reviewer-attestation gap be evaluated through the selected evidence-register entry without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the checksum custody through the retention schedule, specifically resisting historical rewrite.

Evidence selection: evidence-register entry is assessed in relation to retention-boundary trace; no unassigned record is treated as a source.

Ordered test: trace the stated privacy boundary through the review record; then apply the decision rule: reject any conclusion that converts a record into live access.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the evidence route is intelligible without a live-system claim.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant reviewer-attestation gap is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this evidence-register entry; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-000066 (2026-q3) states: Record 66 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-q3; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-000066	2026-q3	Record 66 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-q3; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
