

Privacy Assurance Report 002817

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

Assigned review period: 2026-07-15

Review focus: risk-rating review

Determination

Artifact 002817 is a synthetic Cobalt Harbor Systems privacy assurance record for risk-rating review.

Assigned review period: 2026-07-15. It is distinct from the direct dependency source period(s): 2026-07-14.

Causal question: Can the residual-rating rationale be evaluated through the selected decision linkage without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the owner escalation through the action tracker, specifically resisting unsupported effectiveness.

Evidence selection: decision linkage is assessed in relation to approval-record completeness; no unassigned record is treated as a source.

Ordered test: check that the evidence description remains minimized and synthetic; then apply the decision rule: accept only a conclusion bounded to the stated period.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the bounded record supports a privacy-use limitation.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant residual-rating rationale is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this decision linkage; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-002323 (2026-07-14) states: Record 2323 concludes that treatment review requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Direct dependency facts

Dependency	Source period	Source determination
p03-full-002323	2026-07-14	Record 2323 concludes that treatment review requires a bounded AC-27 evidence review for 2026-07-14; RISK-031 remains Medium after the compensating review, with no personal records in scope.

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
