

# Privacy Assurance Report 002791

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

**Assigned review period:** 2026-07-20

**Review focus:** treatment review

## Determination

Artifact 002791 is a synthetic Cobalt Harbor Systems privacy assurance record for treatment review.

Assigned review period: 2026-07-20. It is distinct from the direct dependency source period(s): 2026-07-20.

Causal question: Can the evidence-completeness threshold be evaluated through the selected privacy boundary without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the owner escalation through the retention schedule, specifically resisting unsupported effectiveness.

Evidence selection: privacy boundary is assessed in relation to privacy-use limitation; no unassigned record is treated as a source.

Ordered test: reconcile the cited case decision with the retention disposition; then apply the decision rule: reject any conclusion that converts a record into live access.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the evidence route is intelligible without a live-system claim.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant evidence-completeness threshold is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this privacy boundary; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Treatment-report branch: trace the source-period owner acknowledgement, counter a claim that acknowledgement closes the exception, and have the control owner confirm closure only after separate evidence review.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-001983 (2026-07-20) states: Record 1983 concludes that treatment review requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope.

## Direct dependency facts

| Dependency      | Source period | Source determination                                                                                                                                                                           |
|-----------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p03-full-001983 | 2026-07-20    | Record 1983 concludes that treatment review requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope. |

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
