

# Privacy Assurance Report 002799

Cobalt Harbor Systems | Aegis Control AC-27 | synthetic defensive evidence

**Assigned review period:** 2026 Q3 planning period (2026-07-01 through 2026-09-30)

**Review focus:** treatment review

## Determination

Artifact 002799 is a synthetic Cobalt Harbor Systems privacy assurance record for treatment review.

Assigned review period: 2026 Q3 planning period (2026-07-01 through 2026-09-30). It is distinct from the direct dependency source period(s): 2026-07-20.

Causal question: Can the compensating-review sequence be evaluated through the selected privacy boundary without extending the AC-27 review beyond synthetic governance evidence?

Analytical lens: examine the owner escalation through the retention schedule, specifically resisting unsupported effectiveness.

Evidence selection: privacy boundary is assessed in relation to exception linkage; no unassigned record is treated as a source.

Ordered test: separate planning-period intent from closure-review evidence; then apply the decision rule: reject any conclusion that converts a record into live access.

Counterexample: treat the same record as proof of a live operational action; that interpretation is rejected because this artifact is a bounded privacy assurance record.

Observation: the scope statement does not expand the underlying population.

Risk finding: RISK-031 remains Medium after compensating review, while the relevant compensating-review sequence is retained as documentation context rather than an incident conclusion.

Decision and owner/timing action: retain this privacy boundary; Privacy Assurance documents the decision now and the GRC evidence-register owner reviews its timing at the next assigned control checkpoint.

Quarterly-report branch: compare Q3 treatment planning to source evidence chronology, counter date substitution, and have the assurance lead preserve both periods in the quarterly review packet.

Boundary: no Kio indexing, search, history, performance, personal record, or live-system claim is made.

Direct dependency p03-full-000618 (2026-07-20) states: Record 618 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope.

## Direct dependency facts

| Dependency      | Source period | Source determination                                                                                                                                                                          |
|-----------------|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p03-full-000618 | 2026-07-20    | Record 618 concludes that assessment scope requires a bounded AC-27 evidence review for 2026-07-20; RISK-031 remains Medium after the compensating review, with no personal records in scope. |

Privacy boundary: minimized synthetic evidence only; no personal records, live-system data, or Kio indexing/search/history/performance claim.
