Artifact-specific analysis

For data retention verification, exclusion was assessed through sampling boundary. The review considered whether the evidence documented in Assurance Evidence Review supports the RISK-031 assurance decision. The documented outcome is that Cobalt Harbor documented the control conclusion for Assurance Evidence Review. The limiting counterexample is that the record distinguishes offline documentary evidence from an instruction to operate a system. Exclusion qualified representativeness; threshold constrained retention; and schedule informed disposal. The evidence method tested control assertions, tested downstream reliance, and established review independence.
