Review narrative

Cobalt Harbor reviewed the assigned evidence for RISK-031 during review date 2026-07-15. The review connects the record to AC-27 / Evidence Set 184 so that a reviewer can understand why the evidence is retained and how it supports the control decision.

Traceability and handling

The record is identified as p03-full-009291 and is associated with source p03-src-009291. Its upstream dependency is p03-full-001285 (source p03-src-001285). The dependency is cited as a provenance link, not as an instruction to execute, contact, or retrieve anything.

Evidence boundary

This is a documentary assurance artifact. No Kio capability is asserted, no credential is present, and no external endpoint is contacted. The reviewer should use the cited relationship and dependency only to reconcile the offline evidence set.

QA-v2 remediation record | p03-full-009291 | 2026-07-15

Artifact-specific analysis

For vulnerability remediation, validation was assessed through residual-risk review. The review considered whether the evidence documented in Assurance Evidence Review supports the RISK-031 assurance decision. The documented outcome is that Cobalt Harbor documented the control conclusion for Assurance Evidence Review. The limiting counterexample is that the record distinguishes offline documentary evidence from an instruction to operate a system. Safeguard qualified monitoring; contingency constrained patch; and exposure informed prioritization. The evidence method segmented sampling boundaries, tested independent attestations, and established decision stability.
