
Renewal playbook

Synthetic internal operating reference for account executives

1

Establish the operating question

What decision must the customer team make, and who owns it?

2

Map evidence

Record known facts, unknowns, assumptions, and the source for each.

3

Align the value narrative

Connect the operating question to a measurable internal hypothesis.

4

Confirm commercial path

Use approved records only; do not convert training examples into offers.

INTERNAL EXAMPLE BOUNDARY

Account Beta planning reference: 2026-09-30, planning USD 186,000. Synthetic planning inputs are separate from approved records and must not be described as commitments.

Renewal playbook

Reusable meeting cadence and decision checks

DISCOVERY CHECKPOINT

Document the desired operational change and decision owner.

VALUE CHECKPOINT

Review the synthetic value hypothesis and evidence quality.

RISK CHECKPOINT

Surface unresolved scope, security, procurement, or data-handling questions.

APPROVAL CHECKPOINT

Verify dates, amounts, and terms against the approved internal source.
