## Scope and conclusion

This evidence status assurance report is assigned to 2026-07-15 and records a bounded review for AR-260713-027 and Aegis Control AC-27. The assigned foundation is p03-full-000785 with source topic evidence status and source period 2026-07-15; that provenance is retained and is not relabeled as this report's canonical type or assigned period. It identifies 48 synthetic privileged-role records, 47 timely attestations, 48 completed after compensating review, and 24 of 24 verified evidence items.

## Control evidence assessment

The review is limited to synthetic control evidence. Its workflow stage is closure follow-up and its review lens is population coverage. RISK-031 remains residual Medium; no statement here represents an intrusion, compromise, or live-system result.

## Retention and use boundary

The package may be retained under the synthetic 18-month evidence minimum. Physical-artifact production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
