

ASSURANCE REPORT

Cobalt Harbor Systems | p03-full-001959 | synthetic defensive GRC record

Assigned review period	2026-q3
Canonical report type	retention disposition
Audit request	AR-260713-027
Source topic	evidence status
Foundation	p03-full-000585 (2026-07-20)
Evidence ref.	EV-184-01

Scope and conclusion

This retention disposition assurance report is assigned to 2026-q3 and records a bounded review for AR-260713-027 and Aegis Control AC-27. The assigned foundation is p03-full-000585 with source topic evidence status and source period 2026-07-20; that provenance is retained and is not relabeled as this report's canonical type or assigned period. It identifies 48 synthetic privileged-role records, 47 timely attestations, 48 completed after compensating review, and 24 of 24 verified evidence items.

Control evidence assessment

The review is limited to synthetic control evidence. Its workflow stage is reviewer confirmation and its review lens is exception aging. RISK-031 remains residual Medium; no statement here represents an intrusion, compromise, or live-system result.

Retention and use boundary

The package may be retained under the synthetic 18-month evidence minimum. Physical-artifact production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
