Question and test

Causal question: does this 2026 07 13 policy retention report correctly apply the source evidence to approval-separation claim, while keeping the assigned review period separate from the source date?

Ordered procedure: first check that approval-separation language remains within the evidence record; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: Assuming individual approval actions from metrics would overstate the source.

Interpretation and follow-up

Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 10, and 48 final completions from 48 synthetic roles. For approval-separation claim, the source date remains 2026-07-20; this report's assigned period is 2026-07-13.

Finding

Finding 006025: identifies the required retention decision for the specific issue of approval-separation claim. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months.
Owner and timing action: GRC should record the separation limitation in the reviewer note before publishing the 2026 07 13 policy retention note. Any variance is recorded against RISK-031 without altering the direct source record.
