|-------------------------|----------------------------------|
| Artifact reference:     | p03-full-006310                  |
| Assigned review period: | 2026-07-14                       |
| Direct source record:   | p03-full-002352 / p03-src-002352 |
| Source record date:     | 2026-07-14                       |

## Question and test

Causal question: does this 2026 07 14 policy exception handling report correctly apply the source evidence to remediation timing, while keeping the assigned review period separate from the source date?

Ordered procedure: first test the remediation-date framing against the source metrics; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: Claiming remediation completion from a metrics row alone would be unsupported.

## Readable source facts

| Control:                  | Aegis Control AC-27                                                 |
| Case:                     | CASE-260713-184                                                     |
| Evidence package:         | Evidence set 184                                                    |
| Review population:        | 48 synthetic privileged-role records                                |
| Timely attestations:      | 47 of 48                                                            |
| Final completion:         | 48 of 48                                                            |
| Risk and residual rating: | RISK-031 / Medium                                                   |
| Retention minimum:        | 18 months                                                           |
| Decision:                 | DEC-260713-004                                                      |
| Action handling:          | Metrics record supports decision review; it assigns no action owner |
| Source sequence:          | 99                                                                  |

# Interpretation and follow-up

## Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 99, and 48 final completions from 48 synthetic roles. For remediation timing, the source date remains 2026-07-14; this report's assigned period is 2026-07-14.

## Finding

Finding 006310: separates governance evidence from live operations for the specific issue of remediation timing. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

## Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months. Owner and timing action: GRC should request a separate remediation record if needed before publishing the 2026 07 14 policy exception handling note. Any variance is recorded against RISK-031 without altering the direct source record.
