Question and test

Causal question: does this 2026 07 14 policy exception handling report correctly apply the source evidence to final-attestation treatment, while keeping the assigned review period separate from the source date?

Ordered procedure: first evaluate final completion as a closure measure; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: Using final completion to infer initial timeliness would be misleading.

Interpretation and follow-up

Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 22, and 48 final completions from 48 synthetic roles. For final-attestation treatment, the source date remains 2026-07-13; this report's assigned period is 2026-07-14.

Finding

Finding 007010: tests the decision against the record for the specific issue of final-attestation treatment. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months.
Owner and timing action: GRC should separate closure evidence from timeliness evidence before publishing the 2026 07 14 policy exception handling note. Any variance is recorded against RISK-031 without altering the direct source record.
