Question and test

Causal question: does this 2026 07 15 policy exception handling report correctly apply the source evidence to case chronology, while keeping the assigned review period separate from the source date?

Ordered procedure: first use case linkage to order the evidence narrative; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: An unordered narrative could attach the metrics to a different case.

Interpretation and follow-up

Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 67, and 48 final completions from 48 synthetic roles. For case chronology, the source date remains 2026-07-20; this report's assigned period is 2026-07-15.

Finding

Finding 006738: identifies the required retention decision for the specific issue of case chronology. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months.
Owner and timing action: GRC should include case chronology in the reviewer handoff before publishing the 2026 07 15 policy exception handling note. Any variance is recorded against RISK-031 without altering the direct source record.
