Question and test

Causal question: does this 2026 07 15 policy retention report correctly apply the source evidence to decision scope, while keeping the assigned review period separate from the source date?

Ordered procedure: first link the decision identifier to the bounded synthetic record; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: Using the decision as a blanket policy approval would exceed the source scope.

Interpretation and follow-up

Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 39, and 48 final completions from 48 synthetic roles. For decision scope, the source date remains 2026-07-15; this report's assigned period is 2026-07-15.

Finding

Finding 005825: records the source period without rewriting it for the specific issue of decision scope. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months. Owner and timing action: GRC should preserve the decision boundary in the disposition memo before publishing the 2026 07 15 policy retention note. Any variance is recorded against RISK-031 without altering the direct source record.
