## Question and test

Causal question: does this 2026 q3 policy exception handling report correctly apply the source evidence to date authority, while keeping the assigned review period separate from the source date?

Ordered procedure: first compare the assigned review period with the source record date; then compare the source control, case, package, numerator, denominator, residual rating and decision; finally test the counterexample: Treating the source date as the report period would conceal whether a later review was performed.

# Interpretation and follow-up

## Interpretation

Observation: the direct record names Aegis Control AC-27 for CASE-260713-184, evidence set 184, source sequence 22, and 48 final completions from 48 synthetic roles. For date authority, the source date remains 2026-07-13; this report's assigned period is 2026-Q3 (2026-07-01 to 2026-09-30).

## Finding

Finding 005210: supports the stated control conclusion for the specific issue of date authority. The evidence supports a governance conclusion because timely attestations are 47 while final completion is 48; the stated residual rating remains Medium, not an incident or access assertion.

## Disposition and follow-up

Disposition: retain this bounded synthetic record under DEC-260713-004 for 18 months. Owner and timing action: GRC should record the date distinction in the review register before publishing the 2026 q3 policy exception handling note. Any variance is recorded against RISK-031 without altering the direct source record.
