

SIEM Export Assurance Report

Export Minimization | 2026-q3 | p03-full-002517

CONTROL CONTEXT

Cobalt Harbor Systems | Aegis Control AC-27 | evidence set 184 | CASE-260713-184 | RISK-031

REVIEW DATE ALIGNMENT

Own assigned review date/period: 2026-Q3 (2026-07-01 through 2026-09-30). Source dependency date/period: 2026-07-20, recorded by direct dependency p03-full-002407.

ASSIGNED EVIDENCE

The assigned dependency p03-full-002407 is the traceability anchor for this synthetic, minimized review.

ASSURANCE REVIEW

The export minimization export is assessed for purpose limitation, category minimization, reviewer acknowledgement, and retention rationale. The report contains no raw telemetry, credentials, identities, or routable addresses.

BOUNDARY

This is fictional defensive governance evidence. It does not claim Kio indexing, search, replay, measured chunks, performance, or a production security outcome.

NEXT GOVERNANCE ACTION

Retain the bounded evidence relationship and route any variance through the AC-27 review process; do not expand the export without a documented need.
