

Sample Collection Manual

Synthetic operational reference | Study Alpha 2026

Purpose

This wholly synthetic internal document supports the Sakura Clinical Study Alpha 2026 snapshot dated 2026-09-02. The cohort is 48 participants: 24 assigned to SC-A 2.5 mg and 24 matched controls. It is not clinical advice and contains no personal or patient information.

Collection windows

Baseline and Day 28 synthetic collection checkpoints use the visit-window reference. No biospecimens, assays, or patient data are involved.

Chain of custody

Use synthetic record IDs, timepoint, reviewer initials, and reconciliation status. Do not enter real identifiers.

Quality checks

Confirm window adherence, completeness, and deviation linkage before aggregate analysis.
