Study Alpha 2026 | synthetic scheduling aid

Visit	Target day	Permitted synthetic window	Check
Baseline	0	0	Eligibility complete
Interim	7	5-9	Safety review
Interim	14	12-16	Data completeness
Outcome	28	25-31	Endpoint lock

Reference

This wholly synthetic internal document supports the Sakura Clinical Study Alpha 2026 snapshot dated 2026-09-02. The cohort is 48 participants: 24 assigned to SC-A 2.5 mg and 24 matched controls. It is not clinical advice and contains no personal or patient information.

Windows

Day 0: enrollment reference; Day 7: 5-9; Day 14: 12-16; Day 28: 25-31. These are simulated operational windows only.

Deviation handling

Outside-window entries are logged, assessed for analysis impact, and reconciled before data lock.

Use limitation

This reference supports synthetic protocol coordination and is not patient care guidance.
