

Statistical output review

Locked synthetic output check | 2026-09-02

Reconciliation

48 analysis cases: 24 SC-A 2.5 mg and 24 Matched control. Day-28 means: -4.8 versus -2.1; adjusted difference: -2.7 (95% CI -4.1 to -1.3).

Population check

Randomized = analysis = Day-28 observed = 48.

Safety check

Six SC-A 2.5 mg participants had seven non-serious events; serious events = 0.

Disposition

Synthetic study-workflow content only; not evidence for clinical use.

Control check	Expected	Observed	Status
Analysis total	48	48	Pass
SC-A cases	24	24	Pass
Matched control cases	24	24	Pass
Serious AEs	0	0	Pass
