

Alpha Case Abstraction Guide

Sakura Clinical | Study Alpha 2026 | Snapshot: 2026-09-02 | Fully synthetic training material

Purpose

This searchable guide defines a synthetic-only abstraction workflow for Study Alpha 2026.

Scope

Use synthetic IDs ALPHA-SYN-001 through ALPHA-SYN-048. Record arm, Day-28 status, and safety classification without adding clinical interpretation.

Quality checks

Confirm 24 SC-A 2.5 mg and 24 matched control records; reconcile seven non-serious synthetic AEs across six participants and zero SAEs.

Boundary

The 2.5 mg reference is a protocol review threshold, not clinical advice.

Synthetic research material only. No real PHI. Not clinical advice.
