

Alpha Case Quality Review Report

Sakura Clinical | Study Alpha 2026 | Snapshot: 2026-09-02 | Fully synthetic training material

Review population

48 wholly synthetic Study Alpha records were reviewed at the 2026-09-02 snapshot.

Completeness

All index IDs were present and arm counts reconciled to 24 SC-A 2.5 mg and 24 matched control.

Outcome trace

Day-28 means were -4.8 and -2.1, respectively; adjusted difference -2.7 (95% CI -4.1 to -1.3).

Safety trace

Seven non-serious synthetic AEs occurred across six participants; zero SAEs were recorded.

Conclusion

The synthetic case package is internally consistent for workflow training. It has no clinical-care purpose.

Synthetic research material only. No real PHI. Not clinical advice.
