

Sakura Clinical Study Beta 2026

Synthetic Case Abstraction Manual | Exploratory Cohort

Purpose

This manual supports internal review of 36 wholly synthetic cases (18/18 allocation). It is not a confirmatory protocol and does

Required fields

1. Synthetic case ID (BETA-SYN-001 to BETA-SYN-036)
2. Visit stage and source artifact reference
3. Threshold review status at 2.5 mg
4. Missingness note and reviewer disposition

Abstraction rules

Record only the invented case identifiers. Do not add names, dates of birth, contact details, site identifiers, or real clinical recor

Cross-study anchor

Study Alpha is distinct: 48 synthetic cases, snapshot 2026-09-02. Do not pool Alpha and Beta data.

Quality check

Two reviewers reconcile field completeness, preserve source provenance, and flag inconsistencies for synthetic training review
