

Windows VDI Research Guide

Sakura Clinical | Study Alpha 2026 | Synthetic workflow reference

Purpose

A fictional workflow reference for working inside a Windows clinical VDI. It describes only document handling for synthetic study materials and does not provide medical, patient-care, or security administration instructions.

Reference workflow

Step	Reference action	Completion cue
1	Open the approved Windows VDI workspace.	Desktop session displays the synthetic study folder.
2	Use the Study Alpha 2026 reference register.	Date is 2026-09-02.
3	Confirm aggregate cohort label.	Cohort shown as 48 synthetic records.
4	Check the reference threshold field.	Value shown as 2.5 mg.
5	Close documents and record review status.	No local exports or identifiers retained.

Boundary

Use approved local procedures for access, retention, and escalation. This sheet intentionally contains no credentials, system addresses, real organizations, or person-level data.
