
Cohort Lock Guideline

SC-ALPHA-GOV-26 | Snapshot 2026-09-02 | Synthetic cohort: 48

Purpose. A reproducible lock checklist for the synthetic cohort of 48.

All examples are synthetic. The 2.5 mg threshold is protocol governance, not medical advice.

Lock conditions

Confirm 48 synthetic records are in scope; reconcile duplicate synthetic identifiers; record the snapshot 2026-09-02.

After lock

Do not silently alter derived counts. Log a correction as a new governed decision with the applicable guideline version.

Evidence package

Retain the synthetic source reference, reviewer role, and version-register row.
