
2.5 mg Threshold Governance Guideline

SC-ALPHA-GOV-26 | Snapshot 2026-09-02 | Synthetic cohort: 48

Purpose. A narrow documentation rule for the fictional Study Alpha protocol threshold.

All examples are synthetic. The 2.5 mg threshold is protocol governance, not medical advice.

Interpretation boundary

The 2.5 mg value is a protocol-governance label used to route synthetic documentation. It is not medical advice, dosing instruction, or clinical recommendation.

Routing

At or below the threshold: confirm standard documentation path. Above the threshold: request an exception review and record rationale.

Required fields

Source reference, snapshot date, rationale, decision owner role, and version register entry.
