
Protocol Deviation Classification Guide

SC-ALPHA-GOV-26 | Snapshot 2026-09-02 | Synthetic cohort: 48

Purpose. A synthetic classification framework for governed documentation.

All examples are synthetic. The 2.5 mg threshold is protocol governance, not medical advice.

Classes

Administrative: missing synthetic metadata. Process: sequence or review-step variance. Analytical: interpretation or calculation variance.

Decision rule

Classify the smallest defensible category, then record a corrective documentation action. Do not infer health status from a synthetic record.

Closure

Closure requires independent review and a versioned record.
